- RC EQUIPMENT

It all began with a **vision** - the belief in the power of imagination, the ability to envision a future, and then create it. Enforced by a driving desire for maximum **perfection**, the vision inspired the transformation of ingenuity into the world's ultimate professional tool and accessory company for model cars.

HUDY products and materials are evidence of the relentless quest to test the limits of technology, design, and new ideas.

The science of kinematics and setup theory enabled **Dipl. Eng. Juraj Hudý** to design new innovative and breakthrough masterpieces that have changed the course of RC history by developing, designing and producing products that have not only changed the world of RC model cars but have also dramatically improved the way that we work on RC models.

World champions need the most reliable, high performance RC tools & accessories... and they look no further than **HUDY**. There is nothing better.

HUDY...The ultimate professional RC accessories

Research in materials, science, and the innovative application of technology have enabled **Dipl. Eng. Juraj Hudy** to create high-tech materials. Continuous exploration and creative use of these materials – combined with functional designs – give every **HUDY** product a unique character and value.

Hardness, durability and **extra-ordinary lifespan**: Dipl. Eng. Juraj Hudy has pioneered the use of **HUDY Spring Steel™**, HUDY's own self-developed unique material that is exclusively blended and manufactured for HUDY based on our own **top-secret** formula which produces the most durable steel used for model racing cars.

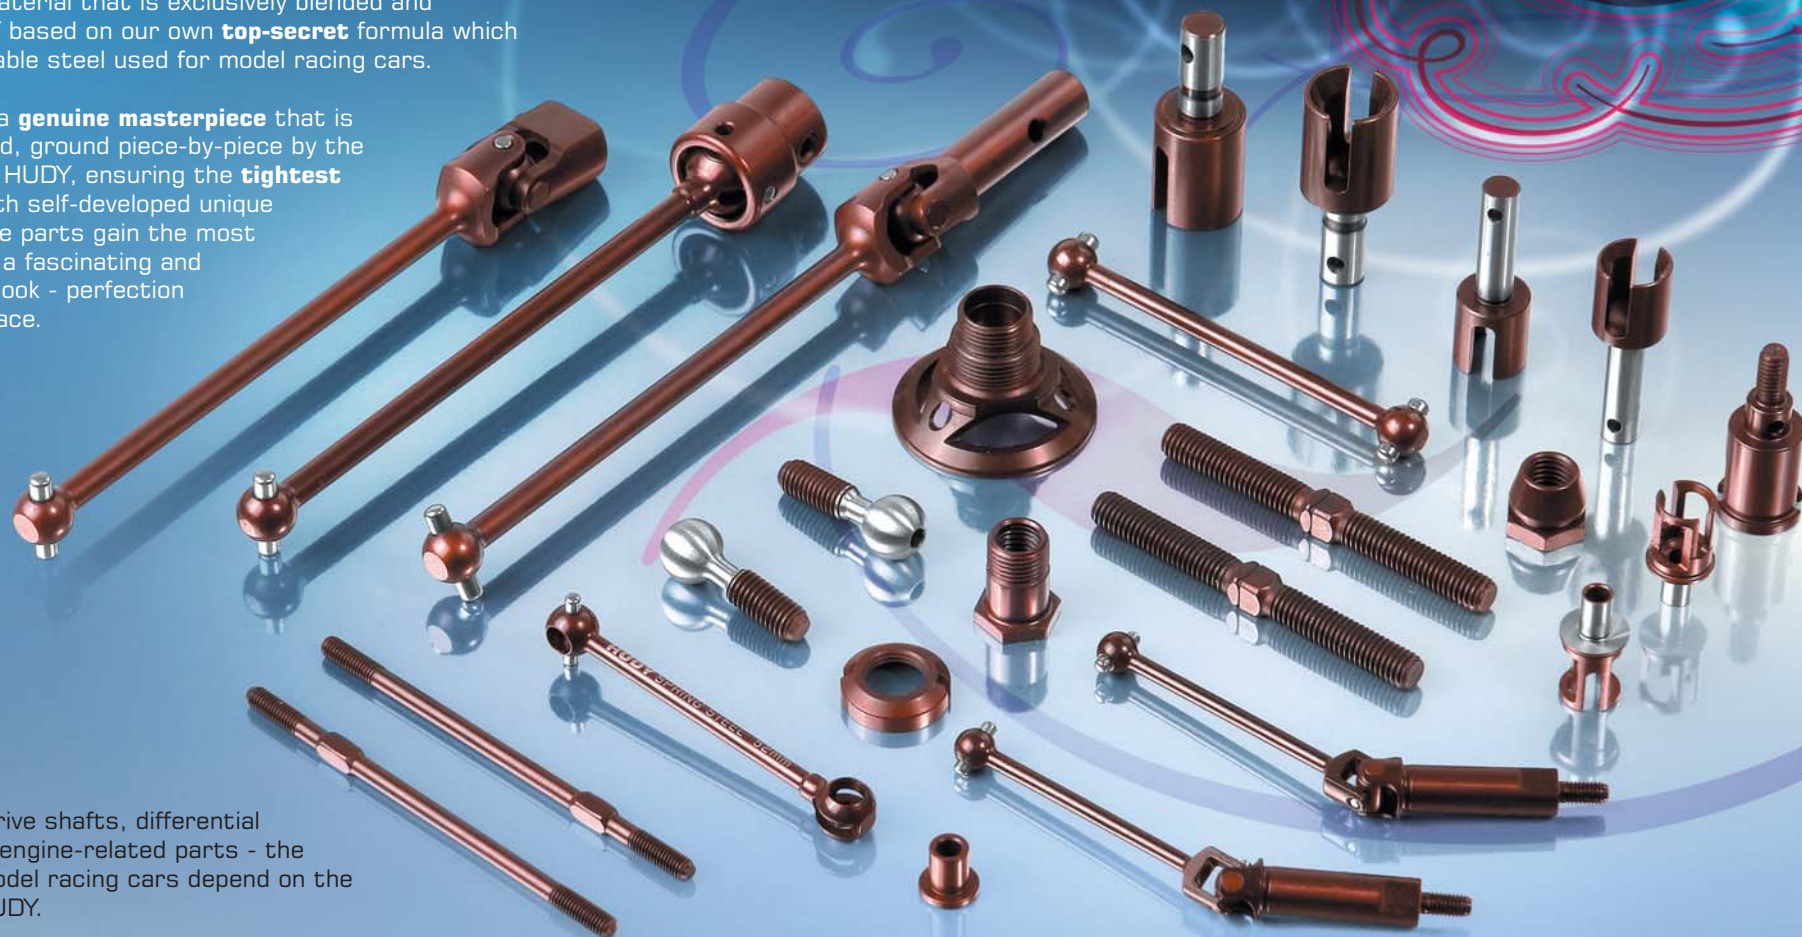

Every HUDY product is a **genuine masterpiece** that is shaped and hand finished, ground piece-by-piece by the precision machinists at HUDY, ensuring the **tightest tolerances**. Finished with self-developed unique hardening processes, the parts gain the most durable attributes with a fascinating and distinctive brown color look - perfection from substance to surface.

HUDY Spring Steel™ drive shafts, differential outdrives, turnbuckles, engine-related parts - the highest performance model racing cars depend on the enduring reliability of HUDY.

Countless National, US, European & World Championships have been won with HUDY Spring Steel™ products.

HUDY SPRING STEEL™

RC WORLD'S MOST PREMIUM MATERIAL

All HUDY products are designed, styled & developed by Dipl. Eng. Juraj Hudy.
Designed, manufactured & assembled exclusively by HUDY in EUROPE.

TIRE TRUERS

**CARBIDE CUTTING TOOL
INCLUDED FREE**

Hudy Tire Truers are known world wide for premium quality, finest craftsmanship, easy set-up and most comfortable and safe use.

The HUDY fully automatic tire truer was the world's first automatic truer designed and developed by Dipl. Eng. Juraj Hudy who incorporated his pride of excellence, craftsmanship and engineering into this masterpiece, which is considered to be the Ferrari of tire truers.

EXCELLENT TIRE TRUER

#102003

- the world's most premium high-tech fully-automatic tire truer
- robust, premium European drive motor for long life and truing of larger diameter tires
- transparent blue protective cover
- universal tool holder for all classes – 1/8, 1/10, 1/12 as well as 1/18 trucks and monster trucks
- carbide cutting tool included
- delivered in exclusive alu carrying case
- adjustable truing diameter (35-85mm)
- adjustable truing angle 0°-2°
- regulated speed for fully-automatic truing
- installed drive motor, gearbox, electronics, and connection cable
- collection container for ground rubber
- fuse overload protection
- solid construction provides best tire cutting result
- wheel adapters (optional) feature HUDY's own center-balanced design that ensures vibration-free operation while truing
- wheel adapters available for all popular wheels 1/8, 1/10, 1/12 and 1/18
- still the best tire truer, imitated by others but never duplicated!

ULTIMATE PROFESSIONAL RC ACCESSORIES

HIGH-END PRODUCTION

27 YEAR TRADITION

HUDY has always been the epitome of **luxury, style, extraordinary design**, and **premium quality**. Unique visions driving high-precision engineering in development & construction.

The HUDY manufacturing facility - equipped with the most modern CNC-machines in the world - produces the best RC model car tools and accessories in the world. The elegant and unique character of **Dipl. Eng. Juraj Hudy's** ideas are reflected in all HUDY products, which have over the decades been renowned as the **world's ultimate RC tools & accessories**. The history of this legendary brand and its formative designer and engineer goes far beyond technology and art - it is also a history of RC model car pioneering. This legacy lives on in every HUDY product.

HUDY products are **masterfully manufactured in Europe** using only the most premium materials available - Swiss 7075 T6 aluminum or lightweight aircraft alloy, high-quality German or Italian composite mixtures, world-renowned **Hudy Spring Steel™**. Every product is a masterpiece on its own, a blending of premium materials and artisan craftsmanship.

The HUDY production facility is located in Slovakia, Europe, and is just a short distance away from the world's other most prestigious RC model car company - XRAY.

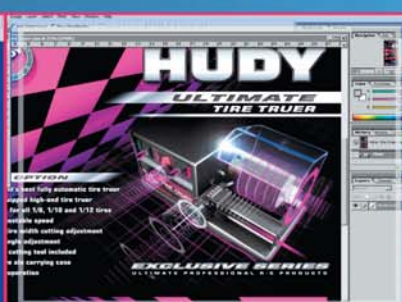

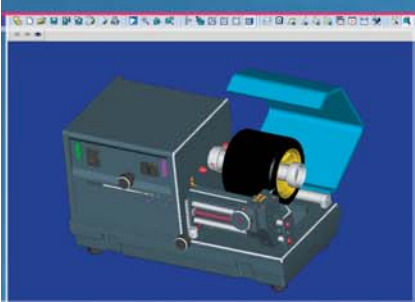

The modern manufacturing facility is completely automated and all products are manufactured in-house without outsourcing. On the working floor area you can find German and Italian CNC-cutting and milling machines, as well as ultra-precise Swiss moulding machines and German injection machines. All machinery is networked to the engineering and **R&D department**, where all products are virtually constructed in industry-leading 3D CAD/CAM programs which not only allow virtual testing of all parts, but also create all the manufacturing programs for the CNC-machines, which are then directly uploaded through the network to the CNC-machines. Fully-automated state-of-the-art production - artwork in its own right.

Total Quality Management (TQM) is used throughout the entire manufacturing process to ensure that every single product meets the strictest and tightest tolerances and requirements for quality and precision. Carefully-selected and highly-qualified employees assemble HUDY products piece-by-piece, using their extensive knowledge and experience to blend the precise, highest-quality parts into genuine HUDY products.
